NOTE.—The number in black-faced type appended to the description of each volume is the serial number in the set of Congressional documents, as adopted in the Checklist of Public Documents issued by this office. Beginning with the 54th Congress, the distinction between Executive documents and Miscellaneous documents was abandoned, in compliance with the provisions of the printing act of Jan. 12, 1895. The same act so reduces the number of copies of the Senate and House journals that they can no longer be supplied to all designated depositories, and consequently no serial number will be given them. The set of sheep-bound Congressional documents for the 1st session of the 54th Congress, to be supplied to the depositories, will consist of 15 volumes of Senate documents, 6 of Senate reports, 88 of House documents, and 10 of House reports.

"The Superintendent of Documents is hereby authorized to sell at cost any public document in his charge, the distribution of which is not herein specifically directed, said cost to be estimated by the Public Printer and based upon printing from stereotyped plates; but only one copy of any document shall be sold to the same person, excepting libraries or schools by which additional copies are desired for separate departments thereof, and Members of Congress; and whenever any officer of the Government having in his charge documents published for sale shall desire to be relieved of the same, he is hereby authorized to turn them over to the Superintendent of Documents, who shall receive and sell them under the provisions of this section."

In accordance with the foregoing provisions, prices are fixed on the documents named in the Catalogue.
